melco DESIGNSHOP 11

Get **more** out of your digitizing software.

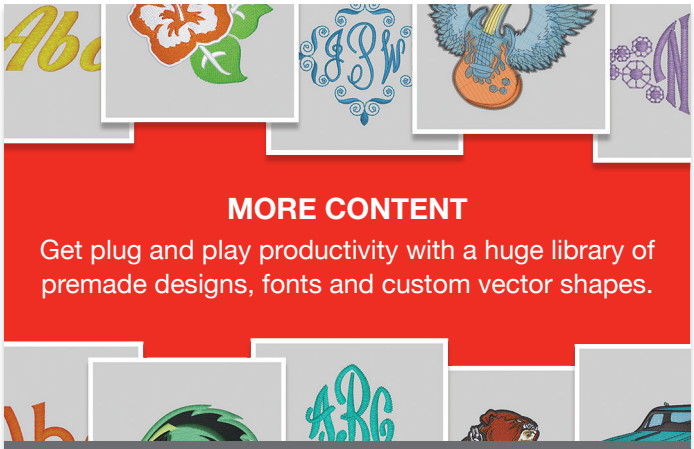
DesignShop 11 knocks down the barrier between your creative vision and professional quality embroidery. We've made profound improvements to every aspect of the digitizing experience, enhancing each step of your process, from thought to thread.

MORE INTUITIVE

4K

Upgrade your user experience with 4K resolution support, scalable user interface and more options easily accessible at your fingertips.

Scalable UI for up to 4K monitors / Quick access buttons for common tasks
Updated advanced printer interface / New categories and filtering for lettering

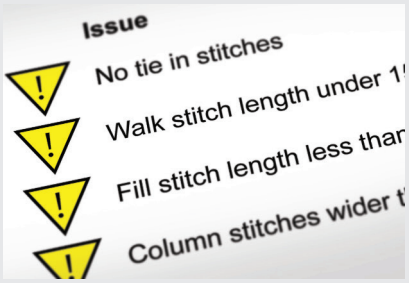


MORE CONTENT

Get plug and play productivity with a huge library of premade designs, fonts and custom vector shapes.

Over 175 fonts and monograms / 1000 stock designs
Drag and drop library for common shapes

MORE ADVANCED



DESIGN CHECKER
Ensure professional results and avoid costly mistakes by verifying your designs using a 13 point pre-check.

CONVERSION ASSISTANT*
Quickly and efficiently convert artwork to vector or stitch files with this feature-rich, step-by-step utility.

ENHANCED LETTERING
Our new alphabets and lettering features give you unparalleled options for placing and modifying lettering and monograms.

**Vector Level Feature*

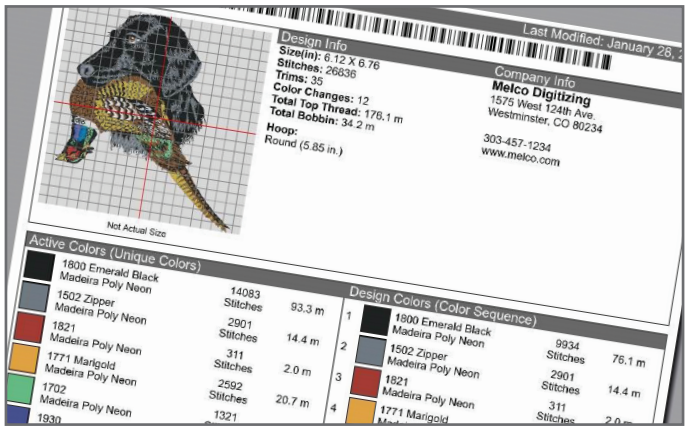
MORE PRODUCTIVE

Automation

Accelerate digitizing and product creation with the automation of common tasks like Auto Primer Stitch, Auto Basting Outline, Auto Underlay, Auto Stippling and Auto Sequencing.

Organization

Streamline your production process with design barcoding. By using a barcode reader at anytime to recall the design, you can eliminate the need to search for design files on hard drives or disks. You can also save design information, such as stitch densities, to specific fabrics or apply fabric profiles to specific designs.



File Support

DesignShop 11 supports a broad spectrum of industry standard file types, including DST, EXP, EPS, ART8, PES, EMB* and more. Plus, our proprietary OFM format allows wireframe editing, machine settings, and color information to be saved and loaded for production.

Built In Thread Charts

Built in charts for Isacord, Madeira and other major industry brands.

**Support for EMB Version 1.8 and earlier*

Choose Your Level

Get the tools that are right for your needs with 4 levels of features. All levels feature new Version 11 enhancement including 4K support, scalable interface, updated stitch engine and much more.

LETTERING
